

Wood/Color Choices and Trim Options for Plaques

Disclaimer: In our experience, we have found that most customers have the highest satisfaction with the black background and either the gold or silver trim and edge paint with a gloss finish. The wood grain selections can vary greatly in appearance due to the nature of wood. Website images can offer an impression of the wood choices, but they may not be representative of the full range of color, texture and grain variations which naturally occur in the wood itself.
